

## Project update

August 2024

## Pier Pavilion

A spectacular public landmark is coming. Pier Pavilion, located in Watermans Cove, will be a stunning public space where people can shelter, meet, gather and relax by the water. Infrastructure NSW has engaged Stephen Edwards Constructions (SEC) to deliver the works.

### Works update

Over the past couple of weeks, construction has been progressing well in preparation for installing the green roof – an important design feature of the pavilion. With the structural steel frame already in place, cross laminated timber has been installed as the roofing substrate and a waterproof membrane laid on top to complete the garden bed. Soil has been lifted to the roof with the crane and spread across the roof. An automated irrigation system has been installed to water the newly planted native species.

#### Did you know?

The green roof is an important element of the Besley & Spreser design which celebrates land, sky and sea. The roof will include over 2,300 plants which are endemic to the area and include a mix of established and new plants.

*Above: Installation of the green roof*

### Upcoming works

Over the coming weeks, SEC is:

- Completing electrical and hydraulic rough-in works to the Cella
- Commencing the internal wall sheeting and fitout process within the Cella

- Installing ceiling framing to the main Pavilion roof
- Commencing the installation Terrazzo facade cladding elements.

## What to expect

Generally, with the majority of the large construction materials delivered to site, the vast majority of deliveries moving forward will be small to medium sized rigid trucks. On a day-to-day basis these will be contained within SEC's site hoarding boundaries and will still be escorted through the public domain areas.

If oversized vehicle deliveries are required, an exclusion zone will be placed around the semi-trailer, marked by barriers. These zones will be in place for around 4-5 hours on the day of delivery and removed soon after. Large truck deliveries are expected to be minimal moving forward on the project.

During large deliveries, pedestrian movements will be diverted around the vehicle exclusion zone, and cyclists will be asked to dismount for a small section of Wulugul Walk. SEC will provide signage and traffic controllers as required to facilitate any necessary diversions.

Construction will continue to occur during standard City of Sydney construction hours, with an extended respite period from high noise emission appliances, detailed below. Other plant and machinery will continue during those hours.

Day	Hours of work
<b>Monday to Friday</b>	<b>7.30am - 5.30pm.</b> Respite period: High noise emission appliances*, plant and/or machinery will <b>not</b> be used between 12pm and 2pm.
<b>Saturday</b>	<b>7.30am - 3.30pm.</b> Respite period: High noise emission appliances*, plant and/or machinery will <b>not</b> be used before 9:30am or after 12pm.

\*High noise emission appliances include machinery such as piledrivers, rock breakers and hydraulic hammers.
